

MAULIKKUMAR CHAUDHARY
Course : **PGP (1 year)**, AI&DS, 2027
Social : Github Linkedin

Jio Institute

Software engineer with 4+ years shipping production web and mobile applications, now expanding into machine learning and data visualization. Blends a strong foundation in React, Next.js, and JavaScript with growing expertise in ML modeling and turning complex data into clear, interactive insights, building data-driven products with applied AI.

ACADEMIC DETAILS

COURSE	SPECIALIZATION	INSTITUTE/COLLEGE	BOARD/UNIVERSITY	SCORE	YEAR
PGP (1 year)	AI&DS	Jio Institute		CGPA	2027
B.Tech	Information and Communication Technology	Dhirubhai Ambani University (prev. DAIICT)	Dhirubhai Ambani University	6.29 CGPA	2019
CLASS XII	Physics/Maths	Reliance School Vadodara	Gujarat Secondary Education Board (GSEB)	83.4 %	2015
CLASS X	General	Vidya Vihar, Vadodara	Gujarat Secondary Education Board (GSEB)	83.16 %	2013

Subjects / Electives	Linear Algebra, Operating systems, Data Visualisation , Human Computer Interaction, Intro to Machine Learning, Probability and Statistics
Technical Proficiency	Node.js, JavaScript, React.js, PostgreSQL, Tableau, Database Systems

WORK EXPERIENCE — 56 Months

Senior Software Engineer, Tekion Corp — **Jan 2020 - Jan 2024**

- Architected and shipped consumer-facing and internal B2B web applications using **React** and **Next.js**, supporting production systems serving 300+ dealerships at scale.
- Delivered consumer-facing applications for end customers, executing a coordinated go-live that rolled out to 20 dealerships in a single day.
- Engineered responsive, high-performance user interfaces with HTML5, CSS3, **JavaScript (ES6+)**, and CSS Modules, partnering with designers and product managers to deliver pixel-perfect, production-ready UI optimized for cross-browser compatibility.
- Led end-to-end UI development of a React Native mobile application from the ground up, owning implementation across two release quarters and delivering on schedule under timelines.
- Collaborated with backend and API teams on large-scale systems, developing strong command of API contracts, caching strategies, and data flow across distributed services.
- **Mentored junior developers** and **interns** through code reviews, debugging support, and structured onboarding, improving team velocity and overall code quality.
- Drove frontend engineering standards across repositories, enforcing coding conventions and best practices that improved maintainability and development workflows.
- Conducted **200+ technical interviews** over four years in a frontend hiring panel, evaluating candidates on JavaScript, React, architecture, and problem-solving.

Software Engineer, ClientJoy — **Apr 2019 - Dec 2019**

- Designed and built **responsive** user interfaces for web-based applications, translating product requirements into functional, user-facing features.
- Developed and maintained backend services and REST APIs for an **e-commerce** application using **Laravel**, contributing across the full stack from data layer to UI.

PROJECTS

Personalised Tax Intelligence Feed - EY India (live project) — **Jun 2026 - Present**

- Built an end-to-end platform delivering a personalised, ranked information feed using a hybrid relevance engine that blends rule-based scoring with **embedding** based semantic similarity. Engineered the full stack scheduled ingestion workers, an LLM-powered extraction pipeline, and an **explainable** web feed with real-time alerts.

Retail Customer Analytics Dashboard — **Jun 2026 - Jul 2026**

- Built an interactive **Tableau** storyboard analyzing 24 months of multi-category retail and e-commerce data to identify **high-value customer segments** and drivers of retention, campaign effectiveness, and regional performance.

STUDY ABROAD

NTU, Singapore **Aug 2026 - Sep 2026**

- **AI & Digital Transformation Coursework:** Built both the strategic and technical foundations of applied AI. Examined how AI fundamentally reshapes the way companies compete, create value and grow (beyond operational efficiency), and gained hands-on command of the end-to-end machine learning workflow, from data understanding and cleaning through model building to performance evaluation.
- **AI in Regulated Industry - Standard Chartered Bank (Industrial Visit):** Explored the role of AI in banking and technology-enabled decision-making through sessions with AI leaders, gaining insight into how artificial intelligence is reshaping the banking environment and how it is responsibly applied within a highly regulated industry with an entrepreneur's perspective adding a practitioner's view on deploying AI under real-world constraints.
- **Applied AI in Industry - Hyundai & Atos (Industrial Visits):** Connected classroom concepts to real deployment across manufacturing and enterprise technology observed Hyundai's smart manufacturing and the design and technology decisions behind its vehicles on the production floor, and saw how Atos, a global technology firm, integrates AI, cloud, cybersecurity and data as combined capabilities to solve business problems at scale.

POSITION OF RESPONSIBILITY

Student representative member of Food Committee - Jio Institute **May 2026 - Present**

- As a member of the Food Committee, I actively contributed to planning and finalizing the food menu while considering student preferences, variety, and overall quality. I was involved in evaluating and selecting suitable food options to ensure smooth daily operations and a satisfactory dining experience.

Member of Student Placement Committee - Jio Institute **May 2026 - Present**

- As a member of the Technical and Placement Committee, I actively contributed to initiatives aimed at improving students' placement preparedness and technical skills. I was involved in organizing workshops and seminars on core topics such as Python, SQL, Data Structures, and Algorithms, helping students strengthen their fundamental knowledge.

AWARDS AND RECOGNITIONS

Amul Vidya Bhushan Award | Amul **Dec 2026**

- The Amul Vidya Bhushan Award recognizes top-performing Class XII students across India for academic excellence, established by Amul to support education.
